Rich and Full Lives

Skillful, informed management of Gorlin syndrome will give you the freedom to enjoy a rich, full life. The GSA is here to help anyone who has Gorlin syndrome or cares about someone with the condition. For symptoms that may be recurrent and progressive, such as cancerous BCC skin lesions and jaw cysts, we can help you expertly manage your healthcare. The utilization of a knowledgeable medical team along with diligent personal care enables individuals with Gorlin syndrome to thrive.

The mission of the Gorlin Syndrome Alliance is to thoughtfully support, comprehensively educate, and aggressively seek treatments, with the ultimate goal of finding a cure.

The GSA works to achieve its goals using the three strategic pillars of education, support and research. Our community includes affected individuals, families, friends, medical professionals and researchers.
